

Kumar Parajuli

Android & Spring Boot Developer

[M parajulikumar9@gmail.com](mailto:parajulikumar9@gmail.com) | [9867486993](tel:9867486993) | [LinkedIn](#) | [Github](#)

Professional Summary

Results-driven Android Java and Spring Boot Developer with 2+ years of experience in designing and developing fintech solutions. Proficient in building secure payment systems for POS terminals (Newland, DX800) and contributing to the FewaGate project using Multi modular architecture. Skilled in developing and maintaining Merchant and Card modules, as well as implementing core payment functionalities like Sale, Void, Reversal, Refund, and Settlement in the FewaPay application. Passionate about delivering scalable and high-performance applications in the fintech domain

Technical Skills

- ◆ **Frameworks & Libraries:** Spring Boot, Android SDK, React, Angular
 - ◆ **Mobile App Development:** Android Java, POS Integration (Newland, DX800)
 - ◆ **Programming Languages:** Java, JavaScript, TypeScript, HTML, CSS
 - ◆ **Databases:** MongoDB, MySQL, Postgres
 - ◆ **APIs:** RESTful Apis, Payment Gateway Integration (Fone pay, Nepal pay), Axios
 - ◆ **Version Control:** Git (GitHub, GitLab)
 - ◆ **Operating Systems:** Windows
 - ◆ **Cloud Platforms & CI/CD:** Azure
 - ◆ **Security:** JWT, Spring Security
 - ◆ **Testing:** Unit Testing, Integration Testing
-

Professional Experience

Android & Spring Boot Developer *Imark Private Limited* - Dillibazar Kathmandu Jan 2023 - Present

- ◆ Contributed to the **FewaGate** project, developing and maintaining backend systems using **Java Spring Boot** with a **Multi modular architecture**.
- ◆ Designed and implemented the **Merchant module**, enabling efficient merchant onboarding, profile management, and transaction tracking.
- ◆ Developed the **Card module**, facilitating secure card registration, transaction processing, and integration with payment gateways like **Fonepay** and **Nepalpay**.
- ◆ Integrated **FewaPay** payment system with **Newland** and **DX800 POS terminals**, optimizing workflows for over 10,000 end-users.
- ◆ Implemented core payment functionalities in **FewaPay**, including:
 - ✓ **Sale:** Processing real-time payment transactions.
 - ✓ **Void:** Canceling authorized transactions before settlement.
 - ✓ **Reversal:** Reversing transactions in case of errors or failures.
 - ✓ **Refund:** Processing refunds for completed transactions.
 - ✓ **Settlement:** Managing end-of-day settlement processes for merchants.
- ◆ Collaborated with cross-functional teams to ensure seamless API integration, improving system reliability by **30%**.
- ◆ Conducted unit and integration testing to ensure robust and bug-free applications.

Education

Bachelor of Computer Information System

Crimson College of Technology - Pokhara University
2017 - 2022

Some Projects

◆ fewaGate

- ✓ Developed a backend system for a fintech gateway using **Java Spring Boot** and **Multi Modular Architecture**.
- ✓ Designed and implemented the **Merchant module** for merchant onboarding and transaction management.
- ✓ Features: Transaction processing, settlement management, and analytics.
- ✓ **Result:** Enhanced operational efficiency, scalability of the payment gateway. and decision-making for merchants

◆ FewaPay

- ✓ Built an Android-based POS application for payment processing.
- ✓ Integrated with **Newland** and **DX800 terminals** using custom APIs.
- ✓ Implemented core payment functionalities: **Sale, Void, Reversal, Refund, and Settlement**.
- ✓ Features: QR reconciliation, in-app receipt printing, real-time transaction tracking.
- ✓ **Result:** Reduced transaction processing time by **30%** and improved merchant satisfaction.

◆ Android Payment System

- ✓ Developed a secure payment system for fintech applications using **Android Java**.
- ✓ Integrated with **Fonepay** and **Nepalpay** for seamless transactions.
- ✓ **Result:** Improved user experience and transaction efficiency.

◆ Achievements

- ✓ Successfully implemented **Multi modular architecture** in the **FewaGate** project, improving code maintainability and scalability.
- ✓ Enhanced system reliability by **30%** through robust API integration and testing.
- ✓ Reduced deployment time by **40%** using **Azure DevOps** and **Docker**.
- ✓ Delivered core payment functionalities (**Sale, Void, Reversal, Refund, Settlement**) in **FewaPay**, improving transaction efficiency and merchant satisfaction.
